Affordable Health Plan Solution for Small Businesses!

The Problem: If you are a small business owner, providing health insurance to your employees can be VERY expensive. Traditional plans are often over \$1500 per month for a family! Also, employees are often not happy with their health insurance options.

The Solution: A better option is to pay for your employees' membership at a direct primary care (DPC) practice like Shumway Family Medicine and combine that with a either Health Share, a high deductible health insurance plan, or even a specially-designed health insurance plan that wraps around direct primary care.

These are a couple of Health Share companies that are a great option for employers and are much cheaper than traditional insurance plans:

Zion Health <https://zionhealth.org/for-employers/>

Sedera <https://sedera.com/memberships/teams>

If you prefer Health Insurance instead of a Health Share, I may be able to connect you to an agent who can help you design plans with an insurance company that wrap around direct primary care. These plans can still be Affordable Care Act compliant, and are MUCH cheaper than traditional insurance plans!

With either of these options, your employees get awesome primary care covered and they have a "high-deductible" style coverage for big things like surgeries or hospitalizations. Plus, this method saves you potentially hundreds of dollars per employee per month!

What to Do: Simply call or email me to find out more details or to get your employees enrolled. I look forward to hearing from you!
